

18.01, Oct. 1 Recitation Suggestions

1. Do some more related rates problem: (1) man walking away from lamppost, how fast does shadow move. (2) p.142, #16, (3) some volume problems like p.142 #3.
2. Review for exam: graphing, lin+quadratic approx, and especially max/min problems
3. Be prepared for students questions about handout practice exam (see my e-mail).
4. Anything else you want!
